 [District 105](#)

Salt River township (pt.of) incl. Perry city All that part lying south of the Paris and Louisiana Public road.

Census Records - Enumeration Districts

U.S. Federal Census records are divided into groups by state, then county, and in many cases by townships and enumeration districts as well. Enumeration districts are subdivisions used by census takers and other governmental representatives to further break down the geography of a given area beyond the county and/or township level. Browsing the census records by enumeration district allows a researcher to see their ancestor in context of their closest neighbors. You may learn additional information about your ancestor by observing their neighbors over a succession of several years.
